PERFORMING A SILENT INSTALLATION

The silent installation feature lets users install QuarkCopyDesk on their computers over a network without having to follow step-by-step instructions. This feature is useful for large group installations when performing manual installations is cumbersome.

PREPARING

To enable Windows users to perform a silent installation on their computers, an administrator must make the following modifications:

- 1 Install QuarkCopyDesk on a network location. The installer creates a "setup.xml" file and a "silent.bat" file in the folder where the installer is located.
- 2 Open the "silent.bat" file in a text editor and make sure the path of the "setup.exe" file is in the first line as follows: "`<path of setup.exe>`" /s /v"/qn".

INSTALLING

To perform a silent installation on Windows:

- 1 Copy the installer folder containing the "setup.xml" and "silent.bat" files to your computer.
- 2 If you are not running Windows Vista, double-click the "silent.bat" file. If you are running Windows Vista, right-click the "silent.bat" file and choose **Run as Administrator**. A console window displays the path where the installer is located and then closes when the installation is complete.

ADDING FILES AFTER INSTALLATION

- 3 Click **Next**.

If you clicked **Modify** in the previous dialog box, the **Custom Setup** screen displays. Make the appropriate modifications and then click **Next**. The **Ready to Modify the Program** screen displays. Click **Install**.

If you clicked **Repair** in the previous dialog box, the **Ready to Repair the Program** screen displays. Click **Install**.

 - 4 Click **Continue** and follow the instructions on your screen.

Installing with QLA

Quark® License Administrator (QLA) is software that manages licensed Quark products. If you purchased a Multi-Pak or a Lab-Pak, you most likely received a QLA CD-ROM when you purchased QuarkCopyDesk. QLA must be installed on your network before you install QuarkCopyDesk.

If QLA is already installed and you are installing QuarkCopyDesk, the **License Server Details** dialog box displays after you enter your registration information. Before proceeding, verify that you have the information you need to enter values in the following fields:

- **License Server Domain Name/IP Address:** Enter the IP address or server name for the server you have designated as the license server. The license server handles requests from license clients.
- **License Server Port:** Enter the value for the license server port. This number is determined when the QLA software is registered online. The license server port is the port through which license server requests flow.
- **Backup License Server Domain Name/IP Address:** Enter the IP address or server name for the server you have designated as the backup license server.
- **Backup License Server Port:** Enter the value for the backup license server port.

Activating

If you have a single-user copy of QuarkCopyDesk, you must activate QuarkCopyDesk. To activate QuarkCopyDesk when you launch it, click **Activate**.

If you do not want to activate QuarkCopyDesk when you launch it, click **Try QuarkCopyDesk (30 day(s) remaining)**. QuarkCopyDesk presents the option to activate it each time you launch the application until you activate it.

If you do not activate QuarkCopyDesk, you can use it for 30 days after installation; after 30 days, the product runs in demonstration mode and must be activated before it will run as a full version.

Uninstalling

MAC OS

To uninstall QuarkCopyDesk, open the "Applications" folder on your hard drive (or the folder in which QuarkCopyDesk was installed) and drag the "QuarkCopyDesk 8" folder to the trash.

WINDOWS

To uninstall QuarkCopyDesk:

 - 3** Click **Yes** to continue or **No** to cancel.
