Installing: Mac OS

To install QuarkCopyDesk:

- 1 Disable any virus protection software. If you are concerned about a virus infecting your computer, run a virus check on the installer file and then disable your virus detection software before updating.
- 2 Double-click the QuarkCopyDesk Installer icon and follow the instructions on the screen.

Performing a silent installation

The silent installation feature lets users install QuarkCopyDesk on their computers over a network without having to follow step-by-step instructions. This feature is useful for large group installations when performing manual installations is cumbersome.

Preparing

To enable Mac OS users to perform a silent installation on their computers, an administrator must make the following modifications:

- 1 Install QuarkCopyDesk on a network location. The installer creates a "setup.xml" file in the folder where the installer is located.
- 2 Open the "setup.xml" file in a text editor and set the value of the `<Setup>` tag's `Silent` attribute to `true`.

Installing

To perform a silent installation on Mac OS:

- 1 Copy the installer folder containing the "setup.xml" file to your computer.
- 2 Double-click the QuarkCopyDesk Installer icon and follow the instructions on the screen.

Performing a drag installation

Rather than using the QuarkCopyDesk installer, you can drag an installed copy of QuarkCopyDesk from a network location to your computer. To perform a drag installation of QuarkCopyDesk:

- 1 Drag an installed copy of the QuarkCopyDesk application folder to your computer.
- 2 Double-click the "QuarkCopyDesk Components" file in the "For System" folder in the QuarkCopyDesk application folder. The **Authenticate** dialog box displays.
- 3 Enter your administrator name and password in the appropriate fields and then click **OK**.
- 4 If the component installer detects multiple copies of QuarkCopyDesk on your computer, the **Select Folder** dialog box displays. Navigate to the folder that contains the copy of QuarkCopyDesk you just copied to your computer and then click **OK**. The component installer starts installing the components.
- 5 Click **Quit** when the installer notifies you that installation is complete.

Adding files after installation

To add files after installation, double-click the QuarkCopyDesk installer icon. Use the **Custom Install** list to select the items to install.

Installing: Windows

To install QuarkCopyDesk:

- 1 Disable any virus protection software. If you are concerned about a virus infecting your computer, run a virus check on the installer file and then disable your virus detection software before updating.
- 2 Double-click the QuarkCopyDesk Installer icon and follow the instructions on the screen.

Performing a silent installation

The silent installation feature lets users install QuarkCopyDesk on their computers over a network without having to follow step-by-step instructions. This feature is useful for large group installations when performing manual installations is cumbersome.

Preparing

To enable Windows users to perform a silent installation on their computers, an administrator must make the following modifications:

- 1 Install QuarkCopyDesk on a network location. The installer creates a "setup.xml" file and a "silent.bat" file in the folder where the installer is located.
- 2 Open the "silent.bat" file in a text editor and make sure the path of the "setup.exe" file is in the first line as follows:
`"<path of setup.exe>" /s /v"/qn".`

Installing

To perform a silent installation on Windows:

- 1 Copy the installer folder containing the "setup.xml" and "silent.bat" files to your computer.
- 2 If you are not running Windows Vista, double-click the "silent.bat" file. If you are running Windows Vista, right-click the "silent.bat" file and choose **Run as Administrator**. A console window displays the path where the installer is located and then closes when the installation is complete.

Adding files after installation

To add files after installation:

- 1 Double-click the "setup.exe" icon. The **QuarkCopyDesk 7.0 - Setup** dialog box displays.
- 2 Click **Next**. The **Program Maintenance** screen displays.
 - Click **Modify** to choose the QuarkCopyDesk files to install. You can install new files or remove previously installed files.
 - Click **Repair** to correct minor issues related to QuarkCopyDesk files. Use this option if you experience issues with missing or damaged QuarkCopyDesk files, shortcuts, or registry entries.
- 3 Click **Next**.

If you clicked **Modify** in the previous dialog box, the **Custom Setup** screen displays. Make the appropriate modifications and then click **Next**. The **Ready to Modify the Program** screen displays. Click **Install**.

If you clicked **Repair** in the previous dialog box, the **Ready to Repair the Program** screen displays. Click **Install**.

4 Click **Finish** when the system notifies you that the process is complete.

Upgrading

To upgrade QuarkCopyDesk:

- 1** Disable any virus protection software. If you are concerned about a virus infecting your computer, run a virus check on the updater file and then disable your virus detection software before updating.
- 2** Double-click the QuarkCopyDesk Installer icon and follow the instructions on the screen.

After you enter your validation code and click **Next**, the installer searches your computer for copies of QuarkCopyDesk that match the validation code you entered. If the installer locates a match, continue with the on-screen installation instructions.

If the installer locates an earlier version of QuarkCopyDesk that does not match your validation code, or if the installer cannot locate an earlier version of the application, a dialog box displays. Choose from among the following options:

- Select **QuarkCopyDesk Application** and then click **Browse** to navigate to the copy of QuarkCopyDesk to upgrade.
- Select **Serial Number** and enter the serial number to upgrade.

After you have made your selection, click **OK**.

NOTE The upgrader installs a new copy of QuarkCopyDesk. It does not replace the earlier version.

Installing or upgrading with QLA

Quark License Administrator (QLA) is software that manages licensed Quark products. If you purchased a Multi-Pak or a Lab-Pak, you most likely received a QLA CD-ROM when you purchased QuarkCopyDesk. QLA must be installed on your network before you install QuarkCopyDesk.

If QLA is already installed and you are installing QuarkCopyDesk, the **License Server Details** dialog box displays after you enter your registration information. Before proceeding, verify that you have the information you need to enter values in the following fields:

- **License Server IP Address:** Enter the IP address or server name for the server you have designated as the license server. The license server handles requests from license clients.

- **License Server Port:** Enter the value for the license server port. This number is determined when the QLA software is registered online. The license server port is the port through which license server requests flow.
- **Backup Server IP Address:** Enter the IP address or server name for the server you have designated as the backup license server.
- **Backup Server Port:** Enter the value for the backup license server port.

Registering

Performing online registration during installation

If you click **Yes** to register during installation, you are directed to the "Online registration" page of the Quark Web site. Follow the instructions on this page.

NOTE If the installer is unable to locate a Web browser or process your registration, the installation is completed without registering your software. To register your software, follow the instructions in "Performing online registration after installation."

NOTE Quark requires up to three days to process your online registration.

NOTE You can also register by phone. See "Contacting Quark" for contact information.

Performing online registration after installation

The installer creates a folder named "Registration Folder" in the QuarkCopyDesk application folder. Use the "Register.htm" file in this folder to register your software using any computer that has Internet access and a compatible Web browser (see "Minimum system requirements").

- 1 Double-click the "Register.htm" file to launch the Web browser and open the file. Or, use the **File** menu in your Web browser to open the "Register.htm" file.
- 2 Review the information in the form, make any necessary changes, and click **Submit** to submit the information to Quark.

Once Quark receives your information, the Web browser displays a window to notify you that registration was successful. You can then exit the Web browser.

Activating

If you have a single-user copy of QuarkCopyDesk, you must activate QuarkCopyDesk. To activate QuarkCopyDesk when you launch it, click **Activate**.

If you do not want to activate QuarkCopyDesk when you launch it, click **Try QuarkCopyDesk (30 day(s) remaining)**. QuarkCopyDesk presents the option to activate it each time you launch the application until you activate it.

If you do not activate QuarkCopyDesk, you can use it for 30 days after installation; after 30 days, the product runs in demonstration mode and must be activated before it will run as a full version.

Uninstalling

Mac OS

To uninstall QuarkCopyDesk, open the “Applications” folder on your hard drive (or the folder in which QuarkCopyDesk was installed) and drag the “QuarkCopyDesk 7.0” folder to the trash.

Windows

To uninstall QuarkCopyDesk:

- 1 Choose **Start → All Programs → QuarkCopyDesk** or **QuarkCopyDesk → Uninstall**.
- 2 Click **Yes**. The uninstaller gathers the information necessary for uninstalling and then an alert displays to notify you that the contents of the QuarkCopyDesk application folder will be deleted.
- 3 Click **Yes** to continue or **No** to cancel.

NOTE If the uninstaller detects a running instance of QuarkCopyDesk, an alert displays. Close the application before you begin to uninstall.

Last-minute changes

Menu items

Some menu items are organized slightly differently in QuarkCopyDesk than they are in the documentation.

Measurements palette

The controls on the **Measurements** palette differ slightly from what is described in the documentation. However, all functionality described in the documentation is present.

Notes submenu

The **Notes** submenu is located on the **Edit** menu, not the **Utilities** menu.

Article guides

The article guides feature is not included in this version of Multiple Article XTensions software. In QuarkCopyDesk, the **View → Article Guides** menu item is not included, but you can display and hide article guides using the **View → Guides** command.

Page pictures

Rather than page pictures, this version of QuarkCopyDesk lets you save spread pictures.

Scale Picture to Fill Box

The **Stretch Picture to Fit Box** button on the **Measurements** palette has been changed to the **Scale Picture to Fill Box** button. This button now increases or decreases the scale of the selected picture so that the picture box is completely filled, *without* changing the picture’s aspect ratio. Note that part of the image may be cropped away when you use this button.

A **Scale Picture to Fill Box** command has also been added to the **Style** menu for pictures.
