QuarkXPress 2017 Known and Resolved Issues

Last updated: 6/16/17

Table of Contents

Known Issues as of QuarkXPress 2017

Following is a list of known issues in QuarkXPress® 2017

- **Fit Text to Box** will not work for a Span/Split/Restart if the box contains more than one column flow block. (276453)

- A frame is applied incorrectly on multiple paragraph text if the text in one of the paragraphs is spanned with a rule underneath. (276525)

- Shading left and right offsets remain outside and the top and bottom moves inside when giving offsets to the frame. (274836)

- The text frame is always in a rectangular shape for Bezier boxes. (271871)

- Applying a Split/Span on paragraph text with a shading frame applied results in a frame that does not join, and the right frame is missing if the split is applied in the last column of multiple columns. (274672)

- The text shading frame overlaps if the leading is not set to **Auto**. (271236)

- Group opacity applied to grouped objects also gets applied to all subsequent objects/images. (277821)

- Focus shifts back to endnote number in body text when endnote text insertion forces an auto page insertion; on typing text thereafter text gets typed in body text. (278559)

- QuarkXPress crashes when importing custom character style sheet from a legacy Job Jacket files if the default color (black) and/or default dash style are not present in the Job Jacket. (278267)

- An applied **Rule Above** attribute is not honored after the text is reflown into separate column blocks using the **Restart Flow** attribute. (192921)

- Dashes created with a few dashes and a gap with no values is getting converted incorrectly to QuarkXPress Native Objects. (251709)

- When outputting to Non PS printers, a flattening issue occurs if the layout contains images with opacity and none picture background or frame blends with opacity. (264299)

    o *Workaround: Apply box background and print.*

- Raster Images in 'Indexed Device N' color space PDF files are not exporting as External linking files while Converting into QuarkXPress Native Objects. (268210)

- There is no way to un-synchronize (stop sharing) All/Multiple items at once, after an Adaptive Layout Scaling / Duplicate. (269612)

- Clicking on a cross reference anchors doesn't navigate properly to the anchor reference in the PDF. (269820)

    o *Workaround: Scroll the PDF document upwards.*

- User is unable to apply image effects to pictures imported in Image 360/Slideshow HTML5 interactivity. (269999)

- Applied image effects are not showing for a picture pan and zoom interactivity box in digital output (ePub, Kindle, App Studio, HTML5). (270000)

- The opacity applied to one instance of text stroking/outline gets applied to all other instances in native output. (270390)

- Incorrect shading is applied when paragraph text has text angle and skew applied. (270582)

- Table data in a row containing a nested table gets overflowed if the row height is more than the box size while importing a Word document. (270668)

- Line Between applied in a text box flows through an obstruction box if the obstruction box is placed over the text box. (270773)

- Line Between applied in a text box is displayed on the side of a spanned column paragraph. (270773)

- Spanned/ Split text is incorrectly placed if vertical text alignment is set to Centered/ bottom. (270783)

- Column span does not get applied if the span count is more than the number of available columns. (271287)

    o *Workaround: Change the span column count to the available number columns.*

- "Clip To Box" does not work if text shading is applied along with frame attributes. (271664)

- Text frame sides are not drawn for contiguous single line paragraphs. (271665)

    o *Workaround: Different Text Shading Styles needs to be applied to alternate paragraphs.*

- Top and Bottom offsets of shading are applied separately on paragraphs that continue to the next column or text box. (271865)

- Gradients, used as colors, for shade and frame, are replaced with white or black during Copy/Paste/Layout Duplicate. (272745)

- Text overflows when resizing the text box height such that the paragraph cannot flow from first column if preceded by spanned column paragraphs. (273462)

- The second column block is ignored in the case of text runaround; The text in the second split/ span column paragraph is overlapped by the obstruction box in the case of two consecutive different column blocks. (273465)

- Blend Mode applied to animated items are not showing in Chrome Browser. (273525)

- Blend Mode applied to animated items are not showing with blend mode in digital output. (273528)

    o *Workaround: Export such items as image, import them in QuarkXPress, then apply Animation.*

- Videos and Audios are not playing in App Studio Apps on iPad with iOS 9.x. (273744)

    o *Workaround: Update to iOS 10 or higher, if possible.*

- Color values of CMY and RGB tints that have a shade/opacity of less than 100% are changed after applying any blending mode other than **Normal**. (274445)

- Text overlap occurs when text doesn't flow in the first column of a split column paragraph. (274706)

- Clipping paths and alpha channels are not saved with the images saved with **Save Picture**. (275019)

- A custom source setup is applied twice to text when applying a blending mode to any object in a document RGB blending color space. (275291)

- User is unable to undo the application of the **Non-Breaking** attribute. (275506)

- Blend modes do not work in Microsoft Edge/Internet Explorer, when exported to HTML5 Publications. (276039)

  - *Workaround: Use an alternative browser like Chrome, Firefox.*

- Gradients, added to the **Color** palette, are not listed in the dropdowns in the **Inline Table Style** dialog. (276218)

- Text Stroke does not work in Microsoft Edge/Internet explorer, when exported to HTML5 Publications. (276324)

- QuarkXPress objects and images having opacity renders as corrupted when applying a blending mode to any object in the layout when the layout view is less than 100%. (276779)

- Top shading offset color does not display in multi-column text flow in paragraph shading. (277088)

  - *Workaround: Press the **Enter** key at the end of the last line on the first column.*

- Text shown as a blur if the project contains interactivity items. (277091)

- There is a memory leak while outputting flattened output if the project contains Picture effects applied images. (277099)

- Shading with opacity applied to text in a table does not output in flattening. (277247)

  - *Workaround: Can be output using native transparency option.*

- Height/Width of a merged text box is not per the bounding box area of selected boxes (selection order) if drop shadow is applied on the selected text box. (277353)

- A new style sheet containing text shading style doesn't get override when changing the text shade locally. (277354)

- The **Reset** button on the **Shape Maker** dialog box is not working. (277367)

- Image 360° Interactivity auto play is not working smoothly in Safari Browser. (277423)

- Preview remains "Black" only when creating a new text shading style with a new color at the application level. (277446)

- CMYK colors of text are converted to different shades after applying a blending mode. (277499)

- Bottom side content placed in scroll zone/section pages is truncated with width fit option. (277986)

- Text content is not shown in HTML page previews if it contains any item with a blend mode applied. (278021)

- The **Non-breaking** attribute gets applied to the entire story when importing a QuarkXPress Tags file created using the **Tag** definition specified in any legacy QuarkXPress version prior to 2017; as a result of text overflows. (278219)

    o *Workaround: Change the XPress Tags definition for non-breaking hyphen/ space from <\!-> or <\!m> to <\!><\!-> or <\!><\!m>.*

- **Fit Box to Text** not working properly for a split column text box. (278387)

Resolved Issues: QuarkXPress 2017 – June 2017 Update (13.0.1)

Following is a list of issues resolved in QuarkXPress 2017 – June 2017 Update. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED:** QuarkXPress crashes on pasting without formatting if the contextual menu is invoked when the Linking Tool is selected. (264957)

- **RESOLVED:** QuarkXPress crashes on importing very large high DPI images. (268496)

- **RESOLVED**: Dependent DLLs of XTensions placed in the system32 or PATH folders fail to load in QuarkXPress 2017. (279096)

- **RESOLVED:** QuarkXPress crashes on importing specific EPS files through ImageGrid, if Picture Info and Fit box to picture is set. (273224)

- **RESOLVED**: The color of Bullets and numbering differs on output. (277403)

- **RESOLVED**: Group opacity applied to grouped objects also gets applied to all subsequent objects/images. (277821)

- **RESOLVED:** Web View interactivity is not displayed in the iOS App if the main HTML page is named index.html. (278335)

- **RESOLVED:** Crash on copying content from a project if the copied content contains callout anchors. (279066)

- **RESOLVED:** Crash on updating missing color profiles from the Collect for Output folder using Profile Manager in specific cases. (278768)

- **RESOLVED:** Unable to apply Button interactivity from HTML5 pallette as the Button tab is blank in some languages. (279974)

- **RESOLVED:** Show/hide interactivity item references are removed on Save, if these items have been created on the Master page. (278449)

- **RESOLVED**: An anchored box positioned in the first line of a text box is shown out of the text box in Digital output if the text box contains any background color. (278539)

- **RESOLVED**: Moving "Randomize Points" slider changes the preview of the shape. (279240)

- **RESOLVED:** Part of the anchored image is not rendered on enabling blending color space when the negative Left Runaround outset value is applied to it. (278185)

- **RESOLVED:** Glyphs overlap on native output when convert to Type 1 for the imported PDFs having embedded TTF fonts. (276869)

- **RESOLVED**: When outputting to Non PS printers, a flattening issue occurs if the layout contains images with opacity and none picture background or frame blends with opacity. (264299)

- **RESOLVED:** Some content in project is not exported to PDF when a PDF with soft-mask is placed across pages. (264731)

- **RESOLVED**: Items with applied opacity on a hidden layer in an AI or PDF files created from Illustrator export incorrectly. (274089)

- **RESOLVED**: Objects filled with White set to Knockout overprint after changing the color to White if the background color is a Spot color in legacy projects. (274214)

- **RESOLVED:** QuarkXPress crashes if a document with thin rules is exported as a flattened PDF. (266295)

- **RESOLVED**: A new RGB Spot color is added to the Colors palette on pasting a copied box with an applied custom color. (278690)

- **RESOLVED**: TIFF, JPG and PNG grayscale images do not convert to BITMAP or 1-Bit when these images are exported as a Bitmap PDF using Export Picture. (277386)

- **RESOLVED:** Custom colors used in a gradient render incorrectly when the layout is appended to a new project. (278720)

- **RESOLVED**: Blends applied to a Gap color are ignored during output as the color is exported with the same color as the frame. (273468)

- **RESOLVED:** QuarkXPress objects and images with the background set to None are pixelated when rendered with a LUT created profile. (278873)

- **RESOLVED:** Inches and Inches Decimal behave the same when the layout zoom is more than 400%. The Ruler does not honour the Units set in Preferences. (262461)

- **RESOLVED:** There should be no scrollbar in the Measurements palette for large Monitors. (278811)

- **RESOLVED**: Crash on importing a custom character style sheet from a legacy Job Jacket file if the default color (black) and/or default Dash style are not present in the Job Jacket. (278687)

- **RESOLVED**: A Table in a group does not scale if the layout contains more than one such group. (278849)

- **RESOLVED:** QuarkXPress hangs on duplicating a layout with adaptive scaling, if it contains a scroll zone with a pop up. (278518)

- **RESOLVED:** QuarkXPress crashes on undo after pasting text containing a Content Variable of type Running Header, if the text is copied twice. (279544)

- **RESOLVED**: QuarkXPress crashes on copy pasting a text box twice after undo if the text box contains a content variable. (278457)

- **RESOLVED:** Open quote gets selected with the word on selection via double click in German. (278170)

- **RESOLVED**: QuarkXPress crashes when copy pasting a text box twice that contains a footnote and an editing footnote from the Footnote styles palette. (278568)

- **RESOLVED**: QuarkXPress crashes on clicking Build Index if the Index Master Page and Index Paragraph stylesheets have been renamed or deleted. (279150)

- **RESOLVED:** Applying Drop caps and justification causes text to flow out of the box. (74341)

- **RESOLVED:** The default increment/ decrement values for Kerning and Tracking have been changed. (279576)

- **RESOLVED:** Gradients, used as colors, for shade and frame, are replaced with white or black during Copy/Paste/Layout Duplicate. (272745)

- **RESOLVED:** The disabled sides of a Frame get enabled when the Text Shading style becomes a part of a Job Jacket. (278117)

- **RESOLVED:** QuarkXPress crashes and frames applied to Span/Split text display all over the screen if the span heading is placed at the bottom. (278305)

- **RESOLVED**: Some of the Picture box Apple Scripts do not work on macOS Sierra. (268768)

- **RESOLVED**: QuarkXPress hangs on moving a text box that contains more than 20 tabs and an alert titled 'This command could not be completed because of unknown system error "bad allocation"' displays. (262829)

- **RESOLVED:** English characters get inserted instead of Korean when typing rapidly on Windows 10. (270871)

- **RESOLVED:** QuarkXPress hangs on inserting paragraph breaks in a split column paragraph. (278936)

- **RESOLVED**: An incorrect leading value gets applied to text containing mixed leading values if the Formats dialog is invoked and confirmed. (280045)

Resolved Issues: QuarkXPress 2017 (13.0)

Following is a list of issues resolved in QuarkXPress 2017. Note that the following is not an exhaustive list of all fixes in this version.

- **RESOLVED:** QuarkXPress crashes when you attempt to duplicate a layout that contains grouped link boxes as anchor items. (90170)

- **RESOLVED:** Text selection in a layout is not shown when searching font references through **Show First/Show Next** if the **Usage** dialog is open. (108114)

- **RESOLVED**: Relocation / Drag / Move and resizing of QR code / Complex Bezier Shapes inserted on a layout is slow as compared to picture boxes. (150901)

- **RESOLVED:** Orthogonal text paths are not retaining preferences. (151474)

- **RESOLVED**: A single PDF is not generated from a Book on the first attempt, if no chapter is open in QXP 10.2; However this works on the second attempt. (190446)

- **RESOLVED**: There is a color conversion issue when applying soft proofing with profiles. (196020)

- **RESOLVED:** Scrolling and typing are slow if an **All Dots** frame style is applied on an inline table style. (204898)

- **RESOLVED:** The use is unable to import an Adobe Illustrator (.ai) /JPEG 2000 file format file using the Image Grid XTension. (205990)

- **RESOLVED:** Locked guides are not scaled and the user has no option on the Layout Scaling and Adaptive Layout Duplicate. (205997)

- **RESOLVED:** Moving back to a layout page from Master page moves you to Page 1. (210496)

- **RESOLVED:** An "Access denied. [-5000]" alert is received when performing CFO when a project name contains the "/" character. (212196)

- **RESOLVED**: A "Maximum History Actions" is wrongly given in Undo Preferences. (214104)

- **RESOLVED**: Unable to apply **Convert Text to Boxes -> Entire Box** on multi-selected text boxes. (214735)

- **RESOLVED:** An extra item style is created when copy pasting an anchored box that has a style with a corner radius. (220858)

- **RESOLVED:** There is an unexpected color change when copying an item with an item style applied to it and an invalid undo history is created during **Copy/Paste**. (220863)

- **RESOLVED**: The user is unable to apply a different footnote separator style to an automatic text box on a Master Page. (225361)

- **RESOLVED:** Some of the TTF Fonts embedded in the PDF are not outputting correctly when converted to Type 1 if the output is in native. (249064)

- **RESOLVED**: There is a color conversion issue on output if the PDF has an embedded profile with a 1 Bit image with CCITT G4 Compression in an AsIs output setup. (250478)

- **RESOLVED**: All output setups are getting exported when exporting a selected output setup. (250556)

- **RESOLVED:** The user is unable to create a new device named "iPad" or "Android" for Digital Layouts (receives an alert that says it already exists). (251821)

- **RESOLVED**: QuarkXPress 10/2015/2016 throws an initialization error during launch and interrupts the program startup on Windows OS, if SafeDllSearchMode, CWDIllegalInDllSearch security settings are enabled. (256274)

- **RESOLVED**: A "Default Non-Breaking Character Set" dialog pops up unexpectedly while performing some layout operations. (257057)

- **RESOLVED:** A performance issue is observed in Book's synchronization. (258503)

- **RESOLVED**: An incorrect button state displays for the **Bold** button in the replacement font dialog when the **Plain** and **Italics** font face of a font are mutli-selected; the **Bold** button is displayed selected and in tristate. (260719)

- **RESOLVED:** The shade value of the selected line path/orthogonal line path is ignored when performing a **Super Step and Repeat**. (261207)

- **RESOLVED:** The **CZ** tool is selected when clicking on a table frame using the **Text Content** tool. (261209)

- **RESOLVED:** *(Windows only):* QuarkXPress crashes when opening a project containing referenced EPS files saved on a Mac and the referenced font is not loaded in the system. (261348)

- **RESOLVED**: Text box sizes in a duplicated digital layout are changed when you close and re-open and text is showing as overflown. (262026)

- **RESOLVED**: The Google Analytics settings are available while previewing HTML5 Publications. (262190)

- **RESOLVED:** User is unable to close the timeline scrubber view for small size pages. (264069)

- **RESOLVED:** No auto scaling happens when viewing a layout designed for a smaller device on any bigger size device. (264070)

- **RESOLVED:** Spread pages options should be available for mobile devices. (264073)

- **RESOLVED:** Auto fit should work for Desktop Browsers. (264074)

- **RESOLVED:** An alert **You cannot link text boxes across master pages or onto the paste board** is displayed when duplicating a layout with link boxes on the Master page. (264110)

- **RESOLVED:** Words preceding tab characters are hyphenated in the Table of Contents if the **Justified** paragraph alignment is applied. (264364)

- **RESOLVED:** There is a performance delay when invoking the **Style** menu after multi-selecting text runs if the **Style Sheets** palette is invoked. (265988)

- **RESOLVED:** Same size Image is showing in full screen for slideshows applied without show uncropped in full screen option. (267194)

- **RESOLVED:** An alert **Fragment identifier is not defined** is displayed if an anchor contains a Right Indent. (267221)

- **RESOLVED:** QuarkXPress crashes when importing Excel files if the cell dimensions are not known. (267797)

- **RESOLVED**: Add support for facing pages on mobile devices. (268727)

- **RESOLVED: Use Existing** doesn't work properly if there a stylesheet conflict while importing a Word file in QuarkXPress. (269003)

- **RESOLVED**: Tab leaders are not aligned from the right in the case of left indented tabs. (269109)

- **RESOLVED**: Audio/Video widget on a slow network is causing other widgets to not load and play. (269392)

- **RESOLVED:** QuarkXPress does not launch on Windows 10, with the remote license file created from QLA Server/Client. (271053)

- **RESOLVED:** The cmd-shift-G shortcut for left align is not working in QuarkXPress 2016 German language. (271188)

- **RESOLVED:** User is unable to add a new paragraph or edit an existing paragraph style sheet if negative incremental leading is input. (271536)

- **RESOLVED:** QuarkXPress crashes when resizing the text/rotating the text box if a drop capped word/drop capped character is selected and **Lock to Page Grid** is applied. (273445)

- **RESOLVED:** QuarkXPress does not launch, hangs/crashes, if the Windows registry has an incorrect/blank default browser path. (273593)

- **RESOLVED**: There is a performance issue when scrolling a project containing rules with style as **All Dots**. (274462)

- **RESOLVED:** Multi-Column text boxes switch to single column while rotating the box through Trackpad. (274721)

- **RESOLVED:** No boundary alert is shown when modifying the left indent value to a value less than the first line indent; unable to create a new paragraph stylesheet with current text run attributes thereafter. (275068)

- **RESOLVED:** QuarkXPress crashes when applying a new paragraph style sheet on a text box if the same stylesheet is referred to in the running header content variable and the user switches between master page and layout pages. (275915)
