Installing or upgrading with QLA

Quark® License Administrator (QLA) is software that manages licensed Quark products. If you purchased an educational site license or a commercial site license, you most likely received a QLA CD-ROM when you purchased QuarkXPress. QLA must be installed on your network before you install QuarkXPress.

If QLA is already installed and you are installing QuarkXPress, the **License Server Details** dialog box displays after you enter your registration information. Before proceeding, verify that you have the information you need to enter values in the following fields:

- **License Server Host Name or IP Address:** Enter the IP address or server name for the server you have designated as the license server. The license server handles requests from license clients.
- **License Server Port:** Enter the value for the license server port. This number is determined when the QLA software is registered online. The license server port is the port through which license server requests flow.
- **Backup License Server Host Name or IP Address:** Enter the IP address or server name for the server you have designated as the backup license server.
- **Backup License Server Port:** Enter the value for the backup license server port.

Registering

To register your copy of the application, visit the "Online registration" page of the Quark Web site (see [Contacting Quark](#)). If you cannot register online, see [Contacting Quark](#) for contact information.

If you do not want to activate QuarkXPress when you launch it, click **Continue**. QuarkXPress presents the option to activate it each time you launch the application until you activate it.

➔ If you cannot activate online, see [Contacting Quark](#) for contact information.
