# Quark XML Author 3.2 ReadMe

The staff of Quark, Inc. would like to thank you for selecting Quark® XML Author to be your XML authoring solution.

Quark XML Author is a mature XML editing solution in intelligence, pharmaceuticals, European governments, and now DITA.

This document provides details on system requirements, installation procedures, changes in the software, and technical support information.

# Quark XML Author System Requirements

The following provides the hardware and software requirements of Quark XML Author for Microsoft® Word.

## Hardware

Quark XML Author requires the following minimum hardware configuration:

- 500 MHz processor
- 512MB of RAM (1GB or more recommended)
- 1GB of available hard disk space
- Display with 1024 x 768 or higher resolution monitor
- Peripherals suitable for Microsoft® Word authoring
- DVD-ROM drive for installation from DVD (not required for installation from download)

## Software

Quark XML Author requires one of the following operating systems:

- Windows® XP Professional with Service Pack 3 (SP3) or higher
- Windows Vista® 32-bit (Enterprise, Business or Ultimate) with Service Pack 1 (SP1) or higher

Quark XML Author requires one of the following versions of Microsoft Office. Also, run Office Updates at Microsoft.com to ensure the latest version is installed.

- Office 2003 (Standard or Professional) Service Pack 3 (SP3) (released 9/17/2007) or higher

In addition, the following components are required for installation:

- .NET Framework 3.5. Quark recommends .NET Framework 3.5 SP1. It is available for download at Microsoft's Download Center: [www.microsoft.com/downloads](http://www.microsoft.com/downloads)

- Microsoft Visual C++ 2008 Redistributable Package (x86). It is available for download at Microsoft's Download Center: <http://www.microsoft.com/downloads/details.aspx?familyid=9b2da534-3e03-4391-8a4d-074b9f2bc1bf&displaylang=en>
- Shared Add-in Support Update for the Microsoft .NET Framework 2.0 (KB908002). It is available for download at Microsoft's Download Center: <http://support.microsoft.com/kb/908002>
- Design Science MathType™ version 6.0 or higher is required for authoring math equations. Math equations are saved in MTEF format only.
- Design Science MathType™ version 6.5 or higher is required for authoring math equations and saving in MTEF or MathML formats.

Once the required installation of Word is complete, you may install Quark XML Author.

# Quark XML Author Installation Procedure

Installing Quark XML Author is a straightforward process. The installation wizard will guide you through each step of the install.

Before you begin to install Quark XML Author, be certain that all required software, including *Microsoft Word*, has already been installed. Also, run Office Updates at Microsoft.com to ensure the latest version is installed. Quark XML Author explicitly uses these latest features. Close *Microsoft Word* and *Microsoft Office*.

To install Quark XML Author, perform the following steps:

- 1 From the installation media, double-click the *setup.exe* file.

The XML Author Setup Wizard is launched and the Microsoft .NET add-in dialog is displayed.

- 2 Click **Install**.

The **Welcome** wizard page is displayed.

- 3 In the **Welcome** wizard page, click **Next**.

The **End-User License Agreement** wizard page is displayed.

- 4 In the **End-User License Agreement** wizard page, click **I accept the terms**. Then click **Next**.

The **Destination Folder** wizard page is displayed.

- 5 In the **Destination Folder** wizard page, you may accept all defaults and skip to Step 7; otherwise, to customize these settings, proceed to Step 6.

- 6 To change the default installation directory that is displayed in Folder (C:\Program Files\Quark\XML Author), specify the new location in Folder. Or click **Browse** and use the Browse feature to locate/create the folder where you wish to install.

- 7 When you are satisfied with all of your choices in the **Destination Folder** wizard page, click **Next**.

The **Ready to Install** wizard page is displayed.

- 8 In the **Ready to Install** wizard page, click **Install** to accept all your selections and begin the installation. Or to change any of the selections made in the previous steps you may click **Back** to go backwards in the wizard. Or, to abort the installation, click **Cancel**.

A status bar shows the progress of the installation. The **Completed** wizard page is displayed when the installation wizard is finished.

- 9 In the **Completed** wizard page, click **Finish**.

Quark XML Author has been successfully installed.

# Changes in this Version

This section describes major changes, new features, and new support in this version of Quark XML Author.

- Support for Design Science MathType™ version 6.5 - 6.6. Previous support included version 6.0.
- Support for MathML-based math equations. Previous support included only MTEF-based math equations.
- Improved usability in the Context Menu for inserting elements.
- Microsoft Office XP is no longer supported.
